These associations *may* apply when these archetypes are a part of the sexual signature of the chart. The information is offered in the spirit of helping individuals identify the archetypal “frequency” to which certain sexual issues may correspond, promoting a deeper understanding of the given issue. It is a list of associations, and not a comprehensive characterization of the sexual dimensions of the archetypes, which cannot be so reductively summarized. The information is based on the work of Jeffrey Wolf Green (zodiac) and Demetra George (asteroids) and ongoing research by Jason Holley, and is under continuous development.
